

Mahboob Chowdhury

Senior Consultant | Software Architect | Cloud Transformation Leader

📍 Plainfield IL | ✉️ mhcl@msn.com | ☎️ 630-229-8752 | 🔗 [LinkedIn](#) / [GitHub](#)

Summary

Results-driven Senior Consultant with **20+ years of experience** in **software architecture, development, DevOps, and cloud transformation**. Expert in **Java (8, 11, 17, 21)/J2EE, Spring Boot, C/C++/C#, Microservices, Messaging (MQ, Kafka), SQL/NoSQL Databases, and Cloud Platforms (Azure, AWS, GCP, PCF, OCP)**. Proven success in leading modernization programs, designing scalable platforms, and mentoring teams.

Key Achievements:

- Led modernization of **200+ applications and 3,000+ microservices** from Pivotal Cloud Foundry to Azure for a leading U.S. financial institution.
 - Designed and deployed **event-driven client management systems** on AWS with Java 21, Spring Boot, Kubernetes, and Jenkins CI/CD.
 - Architected IoT-based smart building platform for **lighting & equipment management**.
 - Delivered **core order management system** for Anixter, improving scalability and performance.
 - Built **liquidity management and financial provisioning platforms** for JPMorgan Chase and Aleri Inc.
 - Key contributor to **Lucent and Alcatel-Lucent telecom platforms**, including **5ESS, DRM/Wireless, data mart/ETL and ASOS simulators**.
-

Core Skills

Languages & Frameworks: Java (8, 11, 17, 21), J2EE, C/C++, Python, JavaScript, ReactJS, Ember JS, JQuery, Hibernate, JSF, Drools

Cloud & DevOps: Azure, AWS, GCP, PCF, OCP, Docker, Kubernetes, Jenkins, Terraform, Helm, Maven, Gradle

Databases: Oracle, MySQL, MS SQL Server, DB2, PostgreSQL, Teradata, Cassandra, MongoDB, Neo4j, Snowflake

Messaging & Streaming: Kafka, MQ

Testing & Automation: JUnit, Karate, Cucumber, Spock, Selenium, QUnit

Tools & Monitoring: Git, SVN, ECMS, Splunk, Kibana, AppDynamics, Azure App Insights

Other: Redis, Elastic Search, Hadoop, MDX, PL/SQL

Professional Experience

Kin + Carta / Valtech USA – *Senior Consultant*

 Oct 2021 – Oct 2025 | USA

- Led **cloud modernization initiatives** migrating 200+ apps & 3,000+ microservices from PCF/Tanzu to Azure and OCP/AWS for Northern Trust and Discover Financial.
- Defined **DevOps pipelines** in Azure, PCF, and OCP to accelerate delivery while ensuring compliance/security.
- Upgraded Discover Financial websites (DiscoverCard.com, DiscoverPrequal.com) by integrating **Java 17, 21 Spring Boot** APIs with React frontends, improving site responsiveness and reliability.
- Delivered secure, scalable APIs with enhanced authentication, API Gateway integration, and asynchronous load-balanced flows, improving performance for Discover Financial websites.
- Integrated Snowflake with downstream reporting tools and real-time APIs, enabling near real-time analytics for Discover Financial customer insights.
- Implemented **secure authentication flows** with Azure Key Vault, Entra ID, Okta/FIDO2, OAuth 2.0/OIDC.
- Authored **migration cookbooks & best practices** to enable client self-sufficiency.
- Modernized and upgraded **Spring Boot microservices** (2.1 → 3.2.5) with subsequent **Java version upgrades from 8, 11, 17, to 21**, to enhance security & performance.
- Developed Spring Boot-based hybrid OpenAI LLM microservices integrating LLaMA/OpenAI models with LangChain and LangGraph to build agentic-AI workflows, prompt-chaining pipelines, and RAG solutions using embeddings and vector search—enhancing automation, developer productivity, and knowledge retrieval across Financial Services modernization programs.
- Converted **multi-repo to mono-repo** structures for financial applications on OpenShift.
- Automated **CI/CD pipelines & test frameworks** with JUnit, Cucumber, and Python/Groovy scripts.

Silver Creek Consulting / Aletha Corp – *Senior Consultant*

 Sep 2020 – Oct 2021

- Developed **microservices for Intuit's software distribution platform** Java 11 Spring Boot on AWS.
 - Delivered **Product Hosting, Billing Conversion, and Response Services**.
 - Built **CI/CD pipelines** using Docker, Jenkins, and Kubernetes.
-

JP Morgan Chase – *Senior Software Engineer / Architect*

 Sep 2017 – Sep 2020

- Designed & implemented **provisioning, request processing, and netting features** for institutional clients in **Java 8 Spring Boot REST services**.
 - Built **Java 8 Spring Boot REST services** integrated with Drools, MQ, Kafka, and Elastic Search.
 - Deployed solutions via **Docker, Kubernetes, and Cloud Foundry**.
 - Created **client management & distribution platform** using Kafka streams, AWS EKS, and advanced monitoring.
 - Integrated Snowflake with Elastic Search and internal dashboards to provide near real-time analytics and operational visibility.
 - Developed **responsive UIs** with ReactJS/Ember JS for reporting & analytics.
-

Wind River Software – *Senior Consultant*

 Apr 2017 – Sep 2017

- Built real-time interface with **VxWorks RTOS**.
 - Developed **Java 8/React Native mobile UI** for Honda navigation system.
-

Anixter Inc. – *Senior Consultant*

 Jun 2014 – Mar 2017

- Designed & delivered **Java 8 Spring Boot-based CORE order management system** with microservices architecture.
 - Implemented **order entry, product customization, and shipping services** using Java Spring & DB2.
-

Earlier Roles

 2007 – 2014

- **Ceport LLC (Senior Architect):** Architected **IoT-enabled Building Management Platform** with **Java, Neo4j & MongoDB**.
- **Vivaki Inc. (Software Architect):** Built **Campaign On-Demand platform** for Publicis clients with **Java REST APIs**.

- **Walgreens/Express Scripts (Manager, Projects):** Delivered **BI web portals & reporting systems** using **Java-based backend services**.
 - **Smith Micro (Sr Consultant):** Developed **Central Configuration Server** for mobile devices using **Java & Tomcat**.
 - **Aleri Inc. (Sr Engineer/Architect):** Designed **Liquidity & Collateral Mgmt. systems** using **Java, MQ & streaming**.
-

Alcatel-Lucent – *Member of Technical Staff*

 1996 – 2007

- Contributed to **telecom software & infrastructure modernization** (5ESS, DRM/Wireless, ASOS) in **C/C++ and Java**.
 - Designed & implemented **provisioning, data mart/ETL, reporting, and simulation systems** in **Java, C++, Oracle, WebSphere**.
 - Delivered **global retrofit automation projects**, improving efficiency across international operations using **C/C++, Java**.
-

Education

- **M.S. in Electrical & Computer Engineering** – University of Victoria, Canada (*1994*)
 - **M.S. in Computer Science & Engineering** – BUET, Bangladesh (*1991*)
 - **B.S. in Electrical & Electronic Engineering** – BUET, Bangladesh (*1988*)
-

Publications

- *Shared Bus Multiprocessor* – AIT-BUET Conference Proceedings (1990)
- *Image Thresholding Techniques* – IEEE Pacific Rim Conference (1995)
